

How to take apart the shake machine

1) 5 minutes before close put on wash

2) AFTER CLOSE: Disconnect syrup tubes

3) Remove syrup collar by rotating it

4) Remove safety collar

5) Lift up on bottom ring to release spindle

6) Drain Machine completely (be sure to remove tube from hopper).

7) Fill up bucket with sanitizer -do not use sanitizer from sink as pictured use the green and white packets.

8) Pour Sanitizer in hopper

9) Break up large chunks of foam from shake mix and wipe sides to loosen film, if needed use paper towel to wipe sides

10) Repeat approximately 3 times until water is mainly clear

- 11) Remove this 'pin', machine will turn off

- 12) Unscrew both knobs

13) after front is removed make sure it is totally disassembled

14) Remove the insides, make sure white cap is removed for proper sanitization

15) Make sure all parts are separate and nothing is left in the machine

16) Spray machine liberally with 'yellow' spray and then wipe with paper towel until dry

17) Machine is now cleaned!

18) Clean and sanitize all parts, once done place all parts into bucket and place in cooler overnight
